

CHAPTER FIVE: DISSEMINATION OF PROJECT RESULTS

A number of complementary strategies were adopted within the life-time of the CATEWE project. Papers based on the conference were presented at a range of conferences at both national and European levels. These included the European Research Network on Transitions in Youth annual workshop, the European Socio-Economic Research Conference and the European Sociological Association annual conference. Furthermore, the CATEWE team organised an International Workshop on Comparative Data on Education-to-Work Transitions, held at the OECD in Paris in June 2000 in association with Network B (on transitions) of the OECD's Educational Indicators Project. The workshop enabled us to disseminate our work to policy-makers, statisticians and researchers from eighteen countries as well as from the European Commission, EUROSTAT, CEDEFOP and the OECD itself. It also gave us the opportunity to contribute to the debate on proposals for future data harmonisation and develop links with interested parties.

A number of the papers presented at conferences have been published in conference proceedings. In addition, articles on the project findings have been published in a number of policy-related journals and CATEWE contributions will be part of a forthcoming volume on *Key Data on Vocational Training* along with a CEDEDOP publication on research on vocational training. The CATEWE working papers have also been made available on our web-site (<http://www.mzes.uni-mannheim.de/projekte/catewe/>). Details of conference papers and publications are given in Table 5.1 below.

At present, a book proposal on the Labour Force Survey analyses is being circulated to relevant publishers. It is intended to submit papers on the School Leaver Survey analyses to scientific journals. We also intend to use existing links among project partners to engage in national-level dissemination to policy-makers and other interested parties.

Table 5.1: Papers and publications by the CATEWE project team
